

CITY OF GRASS VALLEY

PUBLIC WORKS DEPARTMENT - ENGINEERING DIVISION

DESIGN STANDARDS

Revision: December 2010

TABLE OF CONTENTS

Section 1

Purpose and Definitions (PD)

1-1	Purpose	PD 1
1-2	Design Practice	PD 1
1-3	Definitions	PD 1
1-4	Updates	PD 3

Section 2

Permit and Submittal Requirements (PR)

2-1	General	PR 1
2-2	Grading Permits	PR 1
	A. Fees	PR 1
	B. Security	PR 1
	C. Insurance	PR 1
	D. Release of Security	PR 1
2-3	Encroachment Permits	PR 1
	A. Fees	PR 1
	B. Security	PR 2
	C. Insurance	PR 2
	D. Release of Security	PR 2
2-4	Accepted Plans	PR 2
2-5	Submission of Improvement (Grading) Plans	PR 2
	A. Submittal Requirements	PR 2
2-6	Submission of Final and Parcel Maps	PR 3
	A. Submittal Requirements	PR 3
2-7	Subdivision Improvement Agreement	PR 3
2-8	Submission of Lot Line Adjustments	PR 4
	A. Submittal Requirements	PR 4
2-9	Submission of Dedication by Separate Instrument	PR 4
	A. Submittal Requirements	PR 4
2-10	Resubmittal Requirements	PR 5
2-11	Expiration of Plans	PR 5
2-12	Improvement Plan Revisions During Construction	PR 5
	A. Approval Process	PR 5
	B. Plan Revision	PR 6
2-13	Structural Items	PR 6
	A. Private Improvements	PR 6
	B. Public Improvements	PR 6
2-14	Deviation from Standards	PR 6
	A. Design Exceptions	PR 7
	B. Approval	PR 7

Section 3

Plan and Map Requirements (PM)

3-1	General	PM 1
3-2	Sheet Information	PM 1
	A. Drafting Standards	PM 1
	B. Scale	PM 1
	C. Title Block	PM 1

	D. Orientation	PM 1
	E. Order of Plan Sheets	PM 1
3-3	Plan Sheets	PM 2
	A. Title Sheet	PM 2
	B. Standard Notes	PM 3
	C. Detail Sheets	PM 3
	D. Utility Plan Overview	PM 3
	E. Grading and Improvement Sheets	PM 3
	F. Street Plan and Profile Sheets	PM 3
	G. Signing and Striping Plans	PM 4
	H. Signal Plans	PM 4
	I. Other Plans	PM 4
3-4	Parcel and Final Maps	PM 4
	A. Preparation and Form	PM 4
	B. Certificate Sheet	PM 4
	C. Information	PM 5
	D. Additional Data Required	PM 6
3-5	Property of City	PM 7
3-6	Standard Details	PM 7

Section 4 Traffic Impact Studies (TI)

4-1	General	TI 1
4-2	Purpose of Traffic Impact Studies	TI 1
4-3	Requirement for Traffic Impact Studies	TI 1
4-4	Preparation and Submittal Requirements	TI 1
4-5	General Traffic Impact Study Information	TI 2
4-6	Types of Traffic Impact Studies	TI 2
	A. VCA	TI 2
	B. CTS	TI 3
4-7	Traffic Study Format	TI 3
	A. Project Data	TI 3
	B. Project Trip Generation	TI 4
	C. Traffic Analysis Methodology	TI 4
	D. Existing Plus Approved Projects	TI 4
	E. Existing Plus Approved Projects Plus Proposed Projects	TI 5
	F. Cumulative (Existing plus approved projects projected to year 2030)	TI 5
	G. Cumulative (Existing plus approved projects plus proposed project projected to year 2030)	TI 5
	H. Graphics	TI 6
	I. Traffic Accidents	TI 6
	J. Traffic Signals	TI 6
	K. On-Site Circulation	TI 6
	L. Impacts and Mitigation	TI 6
	M. Executive Summary	TI 7

Section 5 Site Access (SA)

5-1	General	SA 1
5-2	Driveway Locations	SA 1
	A. Minor and Primary Residential Streets	SA 1
	B. Collector or Arterial Streets	SA 1
5-3	Number of Driveways Serving a Parcel or Site	SA 1

5-4	Right Turn Deceleration Lanes for Driveways	SA 2
	A. Conditions	SA 2
5-5	Left Turn Deceleration/Acceleration Lanes for Driveways	SA 2
5-6	Minimum Offset for Opposing Driveways	SA 2
	A. Minor and Primary Residential Streets	SA 2
	B. Collector or Arterial Streets	SA 2
5-7	Signalized Driveways	SA 2
5-8	Grooved Concrete Driveway	SA 3
5-9	Vehicle Storage	SA 3
5-10	Fire Apparatus Access Roads	SA 3
	A. Commercial and Industrial Developments	SA 3
	B. Single and Duplex Residential Developments	SA 3
	C. Multiple-Family Residential Developments	SA 3
	D. Road Sections	SA 3
	E. Road Locations	SA 3
	F. Gates	SA 4
	G. Signs	SA 4

Section 6 Streets (ST)

6-1	Street Classes and Geometric Requirements	ST 1
	A. Alley	ST 1
	B. Residential Streets	ST 1
	C. Collector/Industrial	ST 1
	D. Arterial	ST 1
	E. Cul-de-Sac	ST 1
	F. Modified Collector Street	ST 2
6-2	Right-of-Way Width	ST 4
6-3	Roadway Signage and Striping	ST 4
6-4	Structural Section	ST 4
	A. Structural Street Sections at Signalized Intersections	ST 4
6-5	Curb and Gutter Requirements	ST 5
	A. Type 1 Rolled Curb and Gutter	ST 5
	B. Type 2 Vertical Curb and Gutter	ST 5
	C. Cross Gutters	ST 5
6-6	Sidewalk Requirements	ST 5
	A. Width	ST 5
	B. Slopes	ST 5
	C. Pedestrian Curb Ramps	ST 5
	D. Sidewalk Barricades	ST 5
6-7	Pedestrian Walks and Bike Paths	ST 5
6-8	Roadway Profile Standards	ST 6
	A. Grades	ST 6
	B. Cross Slopes	ST 6
	C. Vertical Curves	ST 6
6-9	Intersections	ST 6
	A. Grades	ST 6
	B. Angles	ST 6
6-10	Offset Intersections	ST 6
	A. Residential Intersecting Residential	ST 6
	B. Residential Intersecting Collector	ST 7

	C. Residential or Collector Intersecting Arterial	ST 7
	D. Arterial Intersecting Arterial	ST 7
6-11	Elbow Intersections	ST 7
6-12	Design Sight Distances	ST 7
	A. Stopping Sight Distances	ST 7
	B. Sight Distances at Intersections and Driveways	ST 7
6-13	Centerline Radii	ST 9
6-14	Driveways	ST 10
	A. Types, Widths and Grades	ST 10
	B. Location	ST 10
6-15	Bus Turnouts	ST 10
6-16	Developer Responsibility for Improvements to Streets	ST 10
6-17	Trenching in Existing Paved Roadways	ST 11
6-18	Street Names and Street Name Signs	ST 12
	A. Sign Requirements	ST 12
	B. Location and Number Required	ST 12
6-19	Traffic Signs	ST 12
6-20	Stripings and Markings	ST 13
	A. Fire Hydrant Markers	ST 13
	B. Removal	ST 13
	C. Installation	ST 13
6-21	Traffic Control	ST 14
	A. Restrictions	ST 14
	B. Traffic Control Plans	ST 14
6-22	Survey Monuments	ST 15
6-23	Benchmarks	ST 16
6-24	Deviation from Standards	ST 16

Section 7 Water (W)

7-1	Introduction	W 1
7-2	Design Criteria	W 1
7-3	Current Standards	W 1
7-4	Water Supply Quality	W 1
7-5	Water Supply Pressure	W 1
7-6	Peaking Factors	W 1
7-7	Required Fire Flows	W 2
7-8	Location in Existing Streets	W 2
7-9	Location in Unpaved Areas	W 2
7-10	Transmission System Design	W 2
	A. Transmission Mains	W 2
7-11	Distribution System Design	W 2
	A. Hydraulic Analysis	W 2
	B. Pipe Sizes	W 3
	C. Stubs	W 3
7-12	Water Main Location	W 3
	A. Location	W 3
	B. Vertical Elevation Change	W 4
	C. Cover	W 4
	D. Dead-End Mains	W 4
	E. Public Lines in Commercial Developments	W 4
7-13	Valves	W 4

	A. Locations	W 5
	B. Removal and Abandonment	W 5
	C. Valve Extension Stems	W 5
	D. Air Relief Valves	W 5
7-14	Hydrants and Blow-offs	W 5
	A. Location	W 5
	B. Spacing	W 6
	C. Cul-de Sacs and Dead-end Streets	W 6
	D. Valves	W 6
7-15	Water Services	W 6
	A. Location	W 6
	B. Curb Stamp	W 6
	C. Sizing	W 6
	D. Spacing	W 6
	E. Service Taps	W 6
	F. Water Meters	W 7
7-16	Restraint	W 7
7-17	Work Near Existing Water Mains	W 7
	A. Water Mains 16" and Larger	W 7
7-18	Water Improvement Plan Requirements	W 7
	A. Water Study	W 7
	B. General Requirements	W 7
	C. Layout Sheet	W 7
	D. Plan and Profile Sheets	W 8
	E. Detail Drawings	W 8

Section 8 Sanitary Sewer (SS)

8-1	Design Criteria	SS 1
8-2	Average Flow Determination	SS 1
8-3	Design Flow	SS 1
8-4	Pipe Capacity, Slope, Velocity, Size, Depth and Material	SS 2
	A. Main Sizes	SS 2
	B. Slope and Velocity	SS 2
	C. Capacity	SS 3
	D. Hydraulic Grade Line	SS 3
	E. Depth	SS 3
8-5	Sewer Location and Alignment Requirements	SS 3
	A. General	SS 4
	B. Location in New Streets	SS 4
	C. Location in Existing Streets	SS 4
	D. Location in Unpaved Areas	SS 4
	E. Easement Sewer lines	SS 4
	F. Water Well Clearance	SS 4
	G. Lines in Drainage Swales	SS 4
	H. Alignment	SS 4
	I. Sewer Main Stub	SS 5
8-6	Trench Backfill	SS 5
	A. Bedding and Initial Backfill	SS 5
	B. Special Pipe Strength Requirements	SS 5
8-7	Manhole Criteria	SS 5
	A. General	SS 5

	B. Spacing	SS 5
	C. Invert Elevations	SS 5
	D. Special Construction Requirements	SS 5
	E. Manhole Access	SS 6
	F. Connection City Mains	SS 6
8-8	Drop Connection Criteria	SS 6
8-9	Sewer Service Design	SS 6
	A. General	SS 6
	B. Sizing	SS 6
	C. Depth	SS 7
	D. Special Requirements in Developed Areas	SS 7
	E. Connection to Existing Sewer Stubs	SS 7
	F. Abandoning Existing Sewer Stubs	SS 8
	G. Grease Interceptor	SS 8
	H. Oil/Sand Interceptor	SS 8
	I. Backflow Prevention Device	SS 8
	J. Pressure Relief Device	SS 8
8-10	Creek Crossing Design	SS 8
	A. General	SS 8
	B. Construction and Material	SS 8
	C. Design	SS 8
8-11	Boring and Jacking Requirements	SS 8
8-12	Pump Station and Force Main Requirements	SS 8
	A. Design and Approval	SS 9
	B. Location and Site Plan	SS 9
	C. Capacity	SS 9
	D. System	SS 9
	E. Station Piping	SS 9
	F. Odor Control	SS 9
	G. Force Mains	SS 10
8-13	Sewer Improvement Plan Requirements	SS 10
	A. Sewer Study	SS 10
	B. General Requirements	SS 10
	C. Layout Sheet	SS 10
	D. Plan and Profile Sheets	SS 10
	E. Detail Drawings	SS 11
	F. Connection to Facilities Where Stoppage of Existing Flow Will be Required	SS 11
8-14	Multi-Parcel Commercial and Industrial Developments	SS 11
8-15	Example Sewer Flow Calculations	SS 11

Section 9 Strom Drainage (SD)

9-1	General	SD 1
9-2	City Policies and Requirements	SD 1
9-3	Development in a Floodplain	SD 1
9-4	Federal Flood Program	SD 2
9-5	Drainage Diversions	SD 2
9-6	Drainage Easements	SD 2
9-7	Drainage Capacity/Design	SD 3
9-8	Design Peak Discharge Methods	SD 3
9-9	Hydraulic Standards for Drainage Systems	SD 3
	A. Hydraulic Grade Line	SD 3

	B. Manning's Formula	SD 3
9-10	Street Inundation Requirements	SD 3
9-11	Closed Conduits	SD 4
	A. Size and Material	SD 4
	B. Cover Requirements	SD 4
	C. Alignment	SD 5
9-12	Manholes	SD 5
	A. Saddle Manholes	SD 5
	B. Covers	SD 5
	C. Manhole Access	SD 6
9-13	Inlets	SD 6
9-14	Junction Boxes	SD 6
9-15	Inlet and Outlet Structures	SD 6
	A. Headwalls, Wingwalls, and Endwalls	SD 6
	B. Trash Racks and Access Control Racks	SD 6
	C. Flared End Sections	SD 6
	D. Culvert Outlet	SD 6
9-16	Cross Culverts and Bridges	SD 6
	A. Design Storm	SD 7
	B. Computation of Flow	SD 7
9-17	Detention and Retention Basins	SD 8
	A. Hydrologic Criteria	SD 8
	B. Design	SD 8
9-18	Stormwater Treatment Devices	SD 9
	A. Treatment Device Requirements	SD 9
9-19	Access for Maintenance	SD 9
9-20	Submittal Requirements for All HEC-1 Studies	SD 9
	A. HEC-1 Print Out	SD 9
	B. Computer Model CD	SD 9
	C. Watershed Map	SD 10
	D. Summary Sheets	SD 10

Section 10 Grading (GR)

10-1	Introduction	GR 1
10-2	Fees and Security	GR 1
10-3	Preparation	GR 1
10-4	Finished Grading Plan Requirements	GR 1
10-5	Design Requirements	GR 3
	A. Rolling Terrain Grading	GR 3
	B. Boundary Grading	GR 3
	C. Interior Grading	GR 3
	D. Retaining Walls	GR 4
	E. Stormwater Pollution Prevention plan (SWPPP)	GR 4
	F. Mitigation Monitoring Requirement	GR 6
	G. Certifying Pad Elevations	GR 6
	H. Maintenance of Access to Utility Facilities	GR 6

Section 11 Traffic Signals and Lighting (SG)

11-1	Design Criteria	SG 1
11-2	Traffic Signals	SG 1

	A. Vehicle and Pedestrian Signal Types	SG 1
	B. Vehicle Signal Alignment	SG 1
	C. Signal Phasing	SG 1
	D. Protected Left Turn Phasing	SG 1
	E. Vehicle Detection	SG 2
	F. Traffic Signal Interconnect	SG 2
	G. Right Turn Lanes	SG 2
	H. City Supplied Equipment	SG 2
	I. Contractor Supplied Equipment	SG 2
	J. Salvaged Equipment	SG 3
	K. Signal Activation	SG 3
	L. Trenching Within the Roadway	SG 3
11-3	Street Lighting	SG 4
	A. Intersections	SG 4
	B. Cul-de-sacs	SG 4
	C. Spacing	SG 4
	D. Location	SG 4
	E. Pullboxes	SG 4
	F. Conductors	SG 5
	G. Conduit	SG 5
	H. Electrical Equipment and Work	SG 5
11-4	Preparation of Plans	SG 5
	A. Title Sheet	SG 5
	B. Signal and Lighting Sheet	SG 5
	C. Interconnect Sheet	SG 6
	D. Signing and Striping Sheet	SG 6
	E. Photometric Sheet	SG 6

Section 12
Bikeways (BK)

12-1	General	BK 1
12-2	Design Criteria	BK 1
12-3	Plan Approval	BK 1
12-4	Bike Paths in Floodplains	BK 1
12-5	Bike Bridges in Floodplains	BK 1

Section 13
Solid Waste (SW)

13-1	Introduction	SW 1
13-2	Design Criteria	SW 1
	A. General	SW 1
	B. Walls	SW 1
	C. Gates	SW 1
	D. Vehicle Approach and Floor	SW 1
	E. Signs and Striping	SW 1
	F. Location	SW 1
	G. Path of Travel	SW 1
	H. Back-up Lengths	SW 1
